TRIPOD-SRMA Checklist for reporting abstracts of systematic reviews of prediction model studies

Section and topic	Item No	Checklist item
Title		
Title	1	Identify the report as a systematic review or meta-analysis (or both) of diagnostic or prognostic model studies. Specify the target population and outcome(s) predicted as relevant to the review question.
Background		
Rationale	2	Provide an explicit statement of the main objective(s) being addressed with reference to: target population, index and comparator models (as relevant), outcome(s), time (prediction horizon and intended moment of using the model), and setting.
Methods		
Study eligibility criteria	3	Specify study characteristics used as eligibility criteria, including any prediction models of specific interest, and whether development or validation studies (or both) were eligible.
Information sources	4	Specify the information sources (eg, databases, registers) used to identify studies and the date when each was last searched.
Risk of bias and applicability	5	Specify the methods used to assess risk of bias and applicability in the included studies.
Synthesis methods	6	Specify the methods used to synthesise performance measures for each model of interest.
Results		
Included studies	7	Give the total number of included studies and models, and summarise relevant study characteristics and model details.
Results of syntheses	8	Present results for each of the main models of interest. If meta-analysis was used to synthesise study estimates of model performance, report the summary result and confidence/credible interval for each performance measure, together with the number of study estimates contributing.
Discussion		
Limitations of evidence	9	Provide a brief summary of the limitations of the evidence included in the review.
Implications	10	Provide a general interpretation of the results and important implications for research and practice.
Other		
Funding	11	Specify the primary source of funding for the review.
Support	12	Provide the register name and registration number.
